

# CHIRURGISCHE FEDERÖHRNADELN

CHIRURGISCHE FEDERÖHRNADELN im praktischen Schiebeblister:

Durch die Einzelanordnung ist keine gegenseitige Beschädigung der Nadelspitzen mehr möglich

- Schnelle und praktische Einzelentnahme aus dem unsterilen Blister
- Sichere und saubere Lagerung durch einfachen Wiederverschluß

Gehärteter Edelstahl

- hohe Biegefestigkeit
- garantiert rostfrei
- Optimierte Federöhrdesign ■ sicherer Fadenhalt
- vermindert das Risiko einer Verletzung der Fadenoberfläche
- schnelles und leichtes Einfädeln durch optimale Elastizität des Federöhrs
- Reduzierung des Wundtraumas durch scharfen Kantenschliff
- hohe Penetrationsfähigkeit

Präzisionsschliff

# SPRING-EYED NEEDLES

*SPRING-EYED surgical NEEDLES in the practical sliding blister pack*

*Mutual damage to the needle points no longer possible due to the individual packing*

- *Fast and practical removal of individual needles*
- *Safe and clean storage in simple reclosable packs*

*Tempered stainless steel*

- *high bending resistance*
- *guaranteed rustproof*
- Optimised spring eye design* ■ *secure hold for the suture*
- *reduces the risk of damage to the suture's surface*
- *fast and easy suture insertion due to the optimal elasticity of the spring eye*
- Precision honing* ■ *sharply honed cutting edge reduces tissue trauma,*
- *excellent penetration ability*
